RE: Storm Sewer Repair, 105 E. Saginaw Hwy., Grand Ledge, MI 48837

On February 7, 2020, a City plow truck became stuck in the parking lot of 105 E. Saginaw Hwy. The relatively shallow depression in the ground, approximately five (5) foot in diameter, left by the City plow truck was the result of a compromised storm drain underground in that location. The storm drain was repaired on Tuesday, February 11, 2020. The State of Michigan, as the property owner, is handling the restoration of the site this week.
